

Why should I get the COVID-19 vaccine?

SOURCE: FNHA & GOVERNMENT OF CANADA

Swipe to learn more about the benefits of
the vaccine.

It protects.

YOU

The vaccine will teach your body how to fight the COVID-19 virus. The vaccine cannot give you COVID-19.

YOUR LOVED ONES

The more people that get vaccinated, the harder it is for the COVID-19 virus to spread. This is called herd immunity.

YOUR COMMUNITY

There may be a greater risk of an outbreak of the COVID-19 virus in the community if many people remain unvaccinated and unprotected.

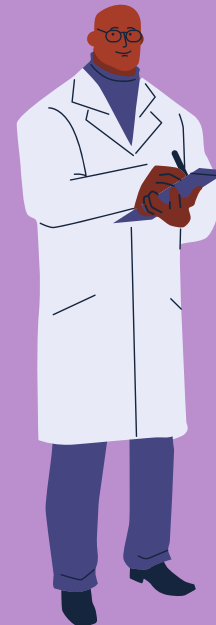

It is safe.

Clinical trials
ensure
vaccines are
safe.

All vaccines
given in Canada
are approved by
Health Canada.

It is effective.

Both Pfizer and Moderna vaccines are up to 92 percent effective at preventing COVID-19 after one dose.

We hope once enough people become protected, our community can return to normal.
